Summary

Data Science Engineering student with international background and strong quantitative training. ML-focused at the nexus of data, finance, and technology, with experience in predictive modeling, portfolio optimization, and risk analysis. Skilled in generative AI (diffusion SDEs) and reinforcement learning; proficient across modern programming languages and collaborative environments.

Education

BSc in Data Science and Engineering *2022–present*
Universidad Autónoma de Madrid (UAM)

- Focused on machine learning, generative AI, and advanced statistical and mathematical modeling
- Served as Board Member of the University Cybersecurity Committee for 1 year
- MVP for AI learning platform at UAM Hackathon (2nd round)

Cloud Engineering Certification *2025-present*
Google Cloud (Online)

Microcredencial: Liga de Inversores *2025*
UAM + IronIA Fintech

- Designed portfolios achieving top Sharpe ratio among 240+ participants
- Applied predictive modeling, portfolio optimization (mean-variance/CVaR), and advanced backtesting

Experience

President & Founder *Jul 2025 – Present*
Google Developer Group on Campus UAM

- Co-founded chapter and currently leading events on AI and tech innovation
- Led strategic direction and multidisciplinary team coordination
- Developed the official website gdguam.es for GDG On Campus UAM

Full-Stack Developer *Jun 2024 –Jul 2025*
VULCASAN SL-Autocenter, Madrid

- Automated operations for a Madrid auto shop network and implemented its website
- Co-developed a production application with a four-person team

Independent Entrepeneur-Imported Clothing Business *Jun 2021 – oct 2024*
DripInLocker

- Operated a professional e-commerce store end-to-end
- Strategically closed to focus on Data Science & Engineering

Honors & Awards

- 1st Place – **UAM Investor's League** (2025)
- Excellence Scholarship – **Community of Madrid** (2025)
- 2nd Place – **Cloud Agent Systems Hackathon**, Google Cloud & Diverger (2025)

Technical Skills

Programming:	Python, R, C++, SQL, JavaScript (Next/React), Bash,
Finance:	Portfolio optimization (Mean-Variance, CVaR), Risk Management, Backtesting
AI/ML:	Scikit-learn, TensorFlow/Keras, PyTorch, Reinforcement Learning, Gen AI
Data/Systems:	PostgreSQL, DuckDB, MongoDB, ETL pipelines, APIs, Distributed Systems
Web/Apps:	Flask, FastAPI, Streamlit, Astro, Next.js, React, Docker
Tools:	Git/GitHub, Linux, VSCode, Jupyter, Cloud (Google Cloud, Vertex AI)

Core Skills & Languages

Soft Skills:	Leadership, Creativity, Analysis, Teamwork, Adaptability
Languages:	Spanish (Native); English (C1)
